

## Wild Edens

3x60

EPISODIC BREAKDOWN

### 1. Wild Edens: Russia

Wild Edens Russia captures the rare and iconic wildlife that inhabit every corner of this vast country. The Wild Edens documentary series aims to increase public awareness of global warming and the threat it poses to the particularly vulnerable ecosystems around the world, including Russia, Turkey and South Asia. Wild Edens was initiated by Rosatom, a global carbon-free energy producer, to emphasize the role nuclear energy plays in preventing emissions of 2 billion tons of CO2 annually, comparable to the input of all the forests on the planet.

An Off the Fence production for National Geographic Channel brought to you by Rosatom, a Global carbon-free energy producer.

### 2. Wild Edens: Turkey

At a time of global climate change, Turkey's diverse species adapt to survive during the country's hottest time of year. Wild Edens: Turkey captures the surprising array of ecosystems and the rare and iconic wildlife that inhabit them; From bears and butterflies to vipers and vultures. This film reveals that where East meets West, a biological superpower is forged.

### 3. Wild Edens: South Asia

At a time of global climate change South Asia's diverse species are pushed to survive as their environment changes around them. Wild Edens: South Asia captures many contrasting ecosystems and the rare and charismatic wildlife that inhabit them; an all-star lineup including elephants, rhino, leopards and tigers.
